PROFILE

I am a software engineering undergraduate with a strong passion for Java development, backed by internship experience. Proficient in Java with a solid foundation in object-oriented programming and backend development. Enthusiastic about learning new tools and frameworks in the Java ecosystem and committed to becoming a proficient Java developer.

PROFESSIONAL EXPERIENCE

June 2024 – June 2025
Colombo, Sri Lanka

Cambio Software Engineering, Software Engineer Intern

- Contributed to the maintenance and development of an enterprise-grade healthcare application using Java.
- Led efforts in Java version and Spring framework upgrades to enhance performance.
- Collaborated with cross-functional teams on bug fixes, feature enhancements, and code refactoring in a large-scale legacy system.
- Gained hands-on experience with Agile methodologies, Git version control, and enterprise software architecture.
- Gained experience in internationalization for enterprise applications.

EDUCATION

2022 – present
Colombo

Reading BEng (hons) Software Engineering,
Informatics Institute of Technology

2019 – 2022
Kegalle

GCE Advanced Level, Kegalu Vidyalaya
Completed Advanced Level in the Maths Field

2018
Kegalle

GCE Ordinary Level, Royal International School Kegalle
Completed GCE ordinary Level in 2018

PROJECTS

September 2025 – Present

Real-time Plywood Defect Detection and Reasoning System (Python, React, Machine Learning) - Ongoing
This ongoing research project focuses on developing an AI-driven system that detects and classifies plywood surface defects in real time using dual-camera computer vision. The system integrates a reasoning module to provide possible manufacturing causes and preventive recommendations, aiming to enhance quality control and decision-making in industrial environments.

September 2023 – April 2024

GestureSway, Hand gesture based snake game,
(Python, React, Mongodb, nodeJs)
GestureSway, a collaborative second-year project with five members, presents a web application housing a snake game controlled through hand gesture recognition technology. Designed with machine learning for gesture recognition and the MERN stack for web development, our platform mainly targets the patients with hand mobility issues.

September 2023 – January 2024

Shopping Manager Console, (Java, JavaSwing)
A shopping manager console was created using java and a user interface of the shopping center was created using javaswing. This project was an individual coursework for the Object Oriented Programming module

December 2025 – January 2026

Thread safe exam submission system, (Java)
A thread-safe exam submission system designed to handle high-concurrency uploads during peak assessment periods, ensuring reliability, fairness, and performance under heavy load.

January 2023 – March 2023

CricZone - Website for Cricket lovers, (HTML , CSS , Javascript)
This was a group project consisting of 4 members where a website about cricket was developed using HTML,CSS and Javascript .

DEGREE MODULES

Concurrent Programming - Java

Web Designing and Development

Object Oriented Programming

Database Systems

Server Side Web Development

Software Development Group Project

Algorithms: Theory, Design and Implementation

SKILLS

Technical Skills, Java , Javaswing, Spring, Spring boot, React, php, MongoDB, Python, HTML, CSS, Javascript, MySQL, GIT, Microsoft Office,

Soft Skills, Team Work, Time Management, Leadership, Quick Learner, Hardworking, Communication, Active listening, Self Motivation

EXPERIENCE AND ACHIEVEMENTS

Member of the IEEE Club of IIT

Member of the IEEE Computer Soceity of IIT

Member of the Rotaract Club of IIT

Senior Prefect, Royal International School Kegalle

Member of the School Western Band, Royal International School Kegalle

Tech Triathlon - Designation Challenge, Participated in a hackathon organized by Rootcode labs.
